PROYECTO VALLE DE NACO

Date 30 April 95 Substance Stone, ground Lot Number: 55AC/04
 Object Mano

Cat No. <u>55AC/04-2</u>	Multiples? (a, b, c, etc.) <u>no</u>	Cat by: <u>S</u> Drawn by: <u>S</u>
-----------------------------	---	--

Cat Description:

Paste Group (censers + figurines):	Thickness	Handle width
Form (censers):	Height <u>11.6 cm</u>	Handle thickness
	Width	
	Diameter <u>7.7 cm</u>	

Full Verbal Description: Butt end of a broken mano. The broken end may have been slightly rounded off, over only half of its circumference, but the effort is poor and haphazard compared to manos with clear finishing and reworking. The butt end is concave, irregularly so, and is not polished. The ~~the~~ lack of polish extends 2.4-3.3 cm onto the circumference/working surface; indeed, the greatest diameter (7.7 cm) is where the polish begins. The broken end is 5.65 cm, and the butt 7.2 cm. On the polish begins, it is seen over the entire working surface. There were no faults and no clearly preferential working area. Vesicular basalt.

Drawing on reverse.
